Backend	Node.js, Express.js, Nest.js, Spring Boot
Automation & Integration	n8n, Zapier, API Integration, Webhooks, Web Scraping, RPA, Firecrawl, Chatwoot
Databases	MongoDB, PostgreSQL, MySQL, Supabase
Cloud & DevOps	Docker, Git, GitHub Actions, CI/CD, Vercel

EXPERIENCE

AI Automation Engineer Lean Orchester	Nov 2025 – Present <i>Remote</i>
---	-------------------------------------

- Built production RAG pipeline for Minisport.hk with automated document ingestion, embedding generation, and conversational retrieval, reducing support queries by 60%.
- Engineered enterprise chatbot for Iprint handling 500+ daily queries with integrated Stripe payments, automated scheduling, and FAQ resolution via Chatwoot, improving response time by 45%.
- Converted chatbot into Voice AI Agent using ElevenLabs, enabling natural language voice interactions for expanded accessibility.
- Created RAG-powered support system for Bookielink by scraping LiveChat data, embedding 5K+ Q&A pairs in vector database, achieving 85% accuracy and reducing tickets by 70%.
- Built lead enrichment automation using Apollo API, LLMs, and web scraping to collect company data and decision makers for sales pipeline generation.
- Developed AI-powered scraping systems for Upwork, GitHub, and Indeed to generate company profiles and match candidates to jobs, syncing to CRMs and reducing screening time by 80%.
- Automated ServiceM8 reporting pipeline extracting jobs, technician KPIs, and revenue metrics, saving 15 hours/week of manual work.
- Built browser automation for FindMyEmail to upload CSVs, trigger enrichment jobs, and collect results automatically.
- Created scalable video generation pipelines with AI narration and automated captioning, producing 10+ videos/month from GitHub repos and reaction content.
- Built ConvertKit-Twilio SMS campaign system with Next.js dashboard delivering messages to 10K+ subscribers with 98% deliverability.
- Designed business intelligence dashboard for OlalaHomes displaying daily reports, KPIs, and operational metrics with real-time updates.

Full Stack Developer Intern
Aziin Engineering Solutions

Feb 2024 – May 2024
Hybrid, Sfax, Tunisia

- Architected e-learning SaaS platform serving 1,000+ users with live video (Agora), real-time chat, and AI adaptive learning, boosting engagement by 35%.
- Implemented JWT/OAuth2 authentication with RBAC ensuring SOC-2 compliance and integrated Stripe processing \$2k+ monthly transactions.
- Developed AI exam generator using GPT-4 with auto-grading, reducing instructor workload by 40% for 500+ students.
- Built RAG chatbot answering 3K+ queries monthly with 80% accuracy and designed admin dashboard with analytics and KPI monitoring.
- Optimized performance with zustand state management and code splitting, achieving 40% faster loads
